IB Score: 41/45 | Honors Graduate

Experience & Technical Projects

ProGineer Technologies Company – Full Stack Developer Intern | Jun–Jul 2026

- Developed and enhanced a full-stack Barber Salon Booking web application using Angular, TypeScript, Spring Boot, Java, and MySQL, working across the frontend, backend, database, and API layers.
- Implemented features including JWT-based authentication, salon and service management, appointment scheduling, customer booking, password management, and booking statistics.
- Resolved full-stack bugs and improved application reliability by debugging API communication, appointment-slot logic, database queries, and data formatting issues.
- Used Git and GitHub for version control, branch management, commits, and documenting project changes.

AUS QuickServe – Full-Stack Web Application (Course Project) | Sept–Nov 2025

- Designed and developed a full-stack campus dining website integrating restaurants and cafes on the AUS campus to enhance the on-campus dining experience for AUS students and faculty.
 - Built responsive front-end using HTML, CSS, and JavaScript.
 - Implemented backend services and database logic using Java and SQL.
-
