

## TECHNICAL SKILLS

### Programming

#### Languages:

Python, C++, Java,  
JavaScript, SQL,  
MATLAB

#### Web Development:

HTML, CSS, Bootstrap, Java  
Servlets, FastAPI

#### Tools & Technologies:

Visual Studio, Visual Studio  
Code, Oracle SQL  
Developer, Google Colab,  
JDBC, MySQL

#### Concepts:

Object-Oriented  
Programming, Relational  
Database Design, Data  
Structures & Algorithms,  
Statistical Analysis

#### AI & emerging

#### technologies:

Generative AI, RAG, Prompt  
Engineering, OCR, AI  
Agents, Embeddings, Vector  
Databases

## LANGUAGES

- Arabic - Native
- English - Fluent
- French - Fluent
- Turkish - Fluent

## SOFT SKILLS

- Teamwork
- Communication
- Problem solving
- Time management
- Coordination
- Adaptability

## PROFILE

Computer Science undergraduate at the American University of Sharjah with three years of university coursework and hands-on experience in software development, web applications, databases, artificial intelligence, and data analysis through my internship and academic group projects.

## EDUCATION

### American University of Sharjah – Sharjah, UAE

Bachelor of Science in Computer Science

Aug 2023 – Expected graduation Jun 2027

Dean's List - Spring 2025

### École Française Internationale de Riyad (EFIR) – Riyadh, Saudi Arabia

French Baccalaureate - Mention Très Bien. Completed secondary education under the French curriculum, graduating with Mention Très Bien (highest honors).

## EXPERIENCE & PROJECTS

### AI Intern – Link Development

*Jun 2026 – Jul 2026*

- Worked on practical assignments involving Generative AI, RAG, OCR, prompt engineering, and AI agents.
- Developed a Retrieval-Augmented Generation (RAG) prototype using Python, document chunking, embeddings, vector search, and large language models.
- Built a PDF document summarization application and converted it into a FastAPI with a POST endpoint for document processing.
- Evaluated OCR solutions including Tesseract and EasyOCR and explored Microsoft Azure AI Services.

### AUS QuickServe Website - Web Application Programming Project (CMP257)

- Developed a dynamic web application for AUS students and faculty to order food from campus restaurants and cafés
- Implemented secure authentication, menu browsing, cart management, checkout, and real-time order tracking
- Integrated loyalty points system and database-supported order processing
- Built frontend using HTML, CSS, JavaScript, and Bootstrap
- Developed backend using Java Servlets, JDBC, and MySQL relational database

## CERTIFICATIONS

**Applied AI Agents, Chatbots & RAG** — IBM SkillsBuild - *Jul 2026*

**Generative AI and AI Agent** — IBM SkillsBuild - *Jul 2026*

## LEADERSHIP & ACTIVITIES

### Internal Coordinator – Palestinian Cultural Club, AUS – *Spring 2026*

- Organized cultural, academic, and social student events
- Coordinated internal club activities and logistics
- Communicated with members and supported event planning and execution

### Volunteer – Bint Majed School in Ghana Aus Funding Campaign – *Spring 2026*

- Participated in a fundraising initiative to support educational needs
- Supported community engagement and awareness efforts
